TOSHIBA

KEY FEATURES:

- 900 MHz Analog Cordless Phone
- 2-Line Operation with 3-Way Conferencing
- Simultaneious Operation – Handset and Base
- Dual Keypad
- Speakerphone
- Speaker Volume Control
- Two-Way Intercom
- 40-Channel Auto Scanning
- 7-Day Standby Battery Life
- Reversible Charging System
- Any Key Answer
- Handset Locator/Page
- Hold and Mute

FT8259BK

KEY SELLING BENEFITS:

Advanced Compandor Noise Reduction
Reduces static and line noise for clearer reception. A noise reduction circuit that compresses, then decompresses (or expands) the transmissions between the handset and the base unit, significantly reducing the static and noise.

Analog 900MHz Transmission
Extended-range crystal-clear conversations and more channels to reduce the crowding commonly found on lower frequency units. Unlike typical cordless phones which operate in the 46-49MHz range, 900MHz phones operate at a much higher and wider frequency range (902-928MHz). Sound quality is superior and virtually free of common interference or noise.

Any Key Answer
Eliminates the frustration of trying to find the correct button to answer a call, Toshiba phones will answer when any button is pressed.

Desk / Wall Mountable (Bracket Included)
Toshiba phones include a wall mounting bracket at no additional cost, enabling them to fit into nearly every application.

Dual Keypad and Speakerphone
- Offers the freedom to use the base or handset to dial or answer a call.
- Provides hands-free conversation or 3-way calling.
- The speakerphone can also be used as a 2-way intercom between the handset and base.
- The base can be used to answer or make a call if the hand set is not readily available. May also transfer an incoming call to the handset.

Hearing Aid Compatible / Hearing Aid Volume
Phones can be used by anyone, even those with electronic aid assisted hearing.

Last Number Redial (32 digits)
Tired of dialing those long calling card numbers? Toshiba's 32 digit redial can remember the most recent phone number dialed in addition to the calling card used.

Long Battery Life (7 days)
Less worrying about leaving the handset away from the base. Less chance of the battery running low during a phone conversation.

One Way Page / Handset Locator
Never again worry about a lost phone. Push one button and the handset beeps to disclose its location.

Programmable Digital Security Code
Allows the user to manually set 1 of 65,536 security codes to enable the handset to work with its base.

Reversible Charging System
Significantly reduces the chances of incorrectly placing the handset into the base. Models with Caller ID benefit by allowing the user to see the LCD readout even when the handset is charging.

3-Party Conversations
Allows for multiple party conversations to take place without additional phones connected to the same line. Ability to have a 3-way conversation between the handset, base unit and incoming caller.

Voice Time / Day Stamp
Machine tracks day and time of every call to ensure timely response/follow up. By programming the answering machine with the correct time and day, the stamp records the time and day of the week a message was received.
